I'm setting up a website for a friend, I already have the Flipbook working OK but when I'm embedding the ARI Docs script I only see the script in the article please follow <http://mediterraneanmarket.us/index.php/menu> to view page 3 and 4 Please advice with what I'm doing wrong.

Thank You

Hello,

Could you explain in more details what's wrong? PDF file is loaded by "ARI Docs Viewer" plugin into flip book page:
