Vertical Lines While Flipping

Posted by inspry - 2013/02/18 18:24
_____

Hey there,

I am getting an odd issue where Chrome 24 is showing verticalm lines as the pages flip and then the lines disappear once the page is loaded. Screenshot attached.

Also you can go to http://www.turnils.us/roller-shades-collection.html to see more.

Thank you!

Hello,

It seems this problem with custom CSS rules which is used for the module. Remove "width: 100% !important;" CSS property from .ari-fb-moleskine CSS rule.

I am having this problem even after looking into this thread. I searched all of the CSS styles for a 100% !important and couldn't find anything.

I am using the moleskine theme, Joomla 2.5 and Flip Book version 1.5.2.

The development domain I am using is http://jetsearch.digitaleel.net/

I am not sure what to do, please help point me in the right direction.

_____

Try to set "Width" parameter to 799 in module settings.

Hi there,

I set width to 799 and it fixed issue, but the width of the page is 910, not 799 so the page is cutting off, how can I resolve so I can continue to use 910? Thanks!

_____

"Moleskine" theme is theme with fixed dimensions. It will not work with width equals to 910.

Regards,
ARI Soft

Hi there,

I switched theme to default and still has issue with width of 910. Still see vertical lines on pages in Google Chrome 25

_____

Where we can see the problem? "Moleskine" theme with width equals to 800 is used on the page from your previous

post.

Regards,
ARI Soft

If you go back to my original post, at http://www.turnils.us/roller-shades-collection.html

You click on the right side of the book for 'Decorative Fabrics' and you will see the issue in Google Chrome 25. Thanks!

_____

To inspry: Add the following CSS rules:

BODY .booklet   {overflow:visible !important;}
BODY .booklet .b-page {outline:1px solid transparent;}

or upgrade the module to the latest version.

Regards,
ARI Soft
