## Plugin shows shadows

Posted by IanS - 2013/07/07 19:14

---

The flip book comprises images with no margin where text carries across double pages. If I create a module and disable shadows I get a nice clean display where the pages butt side-by-side.

However when I come to display the module in an article the shadows reappear (see attached image). What steps need to be undertaken to remove those shadows?

Thanks,

Ian [http://www.ari-soft.com/images/fbfiles/images/2013\\_07\\_07\\_201257.png](http://www.ari-soft.com/images/fbfiles/images/2013_07_07_201257.png)

Hello,

Could you provide a link to a page where we can see the book?

The test site is <http://miscellany-live.com/joomla/index.php/programmes/sample-programmes/28-movie-moments>

Thanks,  
Ian

Image margin is defined in site template styles. Add the following CSS rule to a site template CSS file or to "CSS Styles" parameter in module settings to remove margin:

```
DIV.ari-flip-book-page IMG
{
  margin: 0;
}
```

Perfect. I had thought it was a template style problem but the preprocessed div element yielded no obvious style overrides when inspected - and hence no obvious solution.

Thanks very much for the very quick response.

Ian
