IE8 hyperlinks within pages do not work

Posted by caffgx - 2014/04/03 09:21

_____

Hi,

Although the flip book works in IE8, i notice that any hyperlinks within the pages do not work.
 Is this just because it is an old browser or is there anything i can do to fix this?
 I notice on your demo page that the links dont work in IE8 but they do in IE9 so im guessing not?

Thanks

_____

Hello,

Is "Overlay links" parameter in module settings set to "No"?

Regards,
ARI Soft

_____

It was set to "Yes".
Setting to "No" does fix the problem.

Thanks
