
Request

Posted by shamballa - 2014/11/18 02:47

Hello

I would like to request that ARI Flip Book can be made responsive as this is really quite important these days, it really should be! Also, can it be possible to have it to Auto start and turn the pages without having to click any buttons?

If these could be made it would be the best flip book module on J.E.D.

I hope you respond and can make these changes in an update.

Chris

Hello,

All these features and many more are supported by ARI Smart Book extension.

Regards,
ARI Soft
