
Images bad quality

Posted by britta@saxerdesign.com - 2015/05/14 21:10

When I convert a PDF to images and set the quality on 100% the quality of the print is so bad that the user cannot read the newspaper.

Here is a link to our development site: dev.pctimes.co.nz/gallery/pc-times-editions/Publication/

The orininal file is a PDF - is there another way to create a sharp preview?

Hello,

Try to change output format from JPEG to PNG. It creates images with better quality.

Regards,
ARI Soft
