ARI flip book compatibility with joomla
Posted by salgrev - 2016/04/17 06:55

_____

Hello,
I have version 1.5.2 of ARI flip book, which has worked properly up to npow.
Since joomla 3.5.1, I get a white page, related to the fact that I cannot enter an article category in the ARI flip book module. When I do it, it erases the category when recording the module.
Is my version compatible with joomla, last version ?
Sincerely

==

_____

Hello,

The latest version of the extension is 1.7.5. It is compatible with latest Joomla! version. The extension is available in "Member Area" on our site.

Regards,
ARI Soft

_____

Hello
Thanks for your help.
It works now fine.
Sincerely
