## Background color or picture

Posted by Mogwai - 2017/03/05 15:21

---

Hello,

I would like to have another color for the background of the flip book - or even a background image. Can you please tell me which file I need to modify or if there is a code for the css style to place directly in the module? I am so good in reading and changing .css files.

Thanks in advance for the help.

Regards,  
Mogwai

Hello,

Could you provide a link to a page with a book?

Hello,

I forgot to say that it is flip books with photos.

You can see one flip book with some photos here.

Thank you, regards  
Mogwai

Hello,

Add the following CSS rules to change background color of left and right pages:

```
BODY .booklet .b-wrap-left {background-color: red;}  
BODY .booklet .b-wrap-right {background-color: green;}
```

It can be added to "CSS Styles" parameter n module settings or to a site template CSS file.
