hi,

after updating to Joomla 3.9.0 we got this error in frontend and backend:

Fatal error: Cannot make static method Joomla\CMS\Helper\ModuleHelper::getModuleById() non static in class AriModuleHelper in /var/www/vhosts/XXX/httpdocs/docsommer/plugins/content/ariflipbook/ariflipbook/kernel/Module/j16/class.ModuleHelper.php on line 0

Anywone had the same problem and knows how to fix it?

Thx
Frank

Update "Content - ARI Flip Book" plugin to v. 1.7.10. It is available in "Member Area" on our site.
