## Is it possible to get rid of \"Worksheet 1: Sheet1?\"

Posted by ashlic - 2011/03/25 19:38

---

I am using ARI Docs Viewer to add some Excel spreadsheets to my webpage. They show up with a sort of title page for each tab in the spreadsheet, though, such as "Worksheet 1: Sheet1" before the actual Sheet1 is shown. Is there a way to get rid of the title pages since all I want to show is the spreadsheet?

I attached a picture of the thing I'd like to get rid of. <http://www.ari-soft.com/images/fbfiles/images/example.jpg>

Hello,

Unfortunately no. Google Docs Viewer API doesn't provide this ability.

Regards,  
ARI Soft
