zoho viewer caching

_____

Hi,

Can I suggest you add a parameter for caching on zoho viewer.

If you have a doc that changes zoho will only display the new version if cache=false is added as a parameter.

I've hacked your code and hard coded it so my installation will work!

Hello,

Thank you for your suggestions. We have added support of "cache" parameter. It can be defined in {aridoc} tag in the following way:

{aridoc cache="0"}...

or

{aridoc cache="1"}...

It is enabled by default.

Regards,
ARI Soft
