disable open in viewer button on google viewer

Posted by ah_salama - 2011/09/12 04:05

_____

Hello
this is a very nice plugin, thanks, it is very helpful

i'm using this plugin to embed pdfs from a local folder on my website, but the last button on the right (the open in viewer button) displays the full path to the files, which is unwanted in my case, is there a way to disable this button, or even to disable the whole bar

Thanks

_____

Hello,

Do you use Google or Zoho engine to embed PDF file? Could you provide link to a page or a screenshot where we can see the button?

Regards,
ARI Soft

Thanks for your reply, i use google, you can see it here
http://dmstsoft.com/index.php?option=com_content&view=article&id=69&Itemid=445

the site is still under construction so sorry for the miss.

_____

Hi,

I saw that the image google viewer uses in its toolbar (https://www.gstatic.com/docs/gview/images/icon_sprites_6.png) has a print icon. Is it possible to enable this functionality? If so, how can I do that?

Thanks in advance.

_____

Hello,

Google Docs Viewer API doesn't support ability to add print button.

Regards,
ARI Soft

_____

Use the following code:

{aridoc engine="google" width="600" height="300"}docs/Website.docx{/aridoc}

Regards,
ARI Soft
