joomla 1.7.2 and google viewer does not work
Posted by whilders - 2011/11/13 08:16
_____

I use Joomla 1.7.2 and ari-docs viewer 1.1.1 but documents don't get displayed.

The content of the article is:
{aridoc engine="google" width="750" height="1050"}/download/Onderweg-2004-16.pdf{/aridoc}

Another site I manager is running Joomla 1.7.0 there the same content works...

Please HELP!!!

_____

Hello,

Try to use the next code:

{aridoc engine="google" width="750" height="1050"}download/Onderweg-2004-16.pdf{/aridoc}

If it doesn't help provide a link to a page where we can see the problem.

Regards,
ARI Soft

_____

This does not work either but only in Firefox and Internet Explorer it does not work, it does work in Chrome

The url: http://www.pknweespdriemond.nl/index.php?option=com_content&view=article&id=68&Itemid=111

_____

We have checked it in FireFox v. 7.0.1 and the plugin works fine. About IE issue you can read here.

Regards,
ARI Soft

_____

Sorry, but we can't reproduce the problem in FireFox browser.

Regards,
ARI Soft

_____

I solved by disabling a plugin / module which protects the content
