
Having issue with .xls

Posted by CassVox - 2011/12/14 20:02

Hi,

Using Ari Doc Viewer to view an .xls via google w/macros running in it.

File is hosted on my site, has appropriate permissions but gets the "Sorry the page can't be viewed..." error

Page is:
http://reduceright.com/index.php?option=com_content&view=article&id=87&Itemid=302

Any help greatly appreciated!

CassVox

Hello,

What plugin code do you use?

Thanks for the quick response.

```
{aridoc engine="google" width="950" height="550"}documents/Scaled Recipe template.xls{/aridoc}
```

It seems the file is corrupted. The next error occurs when we try to open it in MS Excel:

Odd... as it opens fine via mine... h

EDIT: got it working...

Is there any way to allow the view the macros enabled?

We suppose Google Docs Engine doesn't support macros. It doesn't provide additional parameter(s) to enable or disable them.

It allows it if you host the doc with them...

Ok... thanks for the excellent response time!
