
Background color

Posted by tmeynier - 2012/09/20 13:39

Hello,

I would like to know if it is possible to change background color of Ari Docs Viewer (iFrame mode).

For example, instead of grey, I would like white.

Thank for your answer.

Hello,

What content do you load with help of the plugin?

Regards,
ARI Soft

I have load a PDF.

here my web page :

<http://www.arolys.com/index.php/Test/Test/actualites-test.html>

There is always a grey background and I would like to change it in white.

If you mean Google or Zoho engine, they don't support ability to change background.

If you want to show PDF in IFRAME, a browser addon for showing PDF files should be installed on client computer. A lot

of users don't install it as result they don't see PDF document otherwise it is not possible to change background of this document because it is shown by browser addon.
