
Images with bad color

Posted by CantosSantana - 2013/05/31 19:15

Hello,

please help me. Your tool is really great.

When displaying Images in .pdf (but also in .doc/.docx)

with ari docs Viewer I got a Problem.

Look at the attached image-files and you will understand.

Look at the Colors. The Images are damaged !!!!

Compare it with the images when I open the pdf-file local.

It Looks like a conversion Problem.

The rest of the pdf-file is okay. I got only a Problem with the Images.

Best Regards

CantosSantana http://www.ari-soft.com/images/fbfiles/files/badimages_quality.doc

Hello,

PDF files are loaded via Google Docs service. It can be not fully compatible with version of your PDF file.

Regards,
ARI Soft

Hey. Im having the same problem. Is there any way to convert pdf's to working files?
What format to use etc.

Hello,

Where we can see the problem?

Regards,
ARI Soft

The pdf here has distorted images:

<http://l25.lmadata.dk/index.php/gardbeskrivelser/item/151-bjoernstorps-gods-og-svenstorps-gods>

and this is even worse:

<http://l25.lmadata.dk/index.php/gardbeskrivelser/item/184-asdal-hovedgard>

It should look like this:

http://l25.lmadata.dk/index.php/gardbeskrivelser/item/download/69_390a71b2e814d71a97bbb5418afcd707

Thanks a lot. Wasnt a solution but nice to have an explanation of the problem.
I will try using iframes. The too seem to give me some problems though.
