Hi. Thx for the great plugin. tif file is 15Mb and after several seconds don't loaded: "Sorry, it took too long to find the document at the original source. Please try again later.
You can also try to download the original document by clicking here."

How I can increase the load time? Thx.

Hello,

It seems this is a problem with connection between your server and Google Docs service. For example you can try to place the file to DropBox service.
