
Very large database

Posted by dpsaint - 2014/04/13 11:48

Hi, I haven't purchased this yet - but from reading the reviews and support I'm very interested. I will be looking to use this with very large databases - circa 2 million lines.... Is this able to handle such volumes of data?

Hello,

Your question is really about "ARI Docs Viewer" or another extension?

Sorry, it's about ARI data tables.

The extension can load data from a database partially via AJAX, but it doesn't work with complex SQL queries.
