
Error with AriDoc, not displaying documents

Posted by kevinmorgan - 2014/11/17 19:05

Hello,

We are having problems with AriDoc -- please note that this was working fine and there have been no issues up until this week with it.

The first one displays *sometimes* and the middle one displays "Whoops!" while the bottom says that no preview is available. These all were working previously.

The console view shows errors which may/may not be related.

<http://www.fbpe.org/meetings-and-information/engineering-directory>

This page exhibits similar actions, where the view is not working.

<http://www.fbpe.org/licensure/license-renewal>

The following are the console errors, I've expanded the first for your benefit:

Hello,

It seems Google is updating their service (Google Docs) and it causes some problems (for example shows "Whoops" message). We suppose they fix it in nearest time.

Regards,
ARI Soft
