Hello,

If you use a WYSIWYG editor, switch to a plain text mode and check plugin code. If it doesn't help, send a link to a page where the problem occurs.

The code is note via WYSIWYG.
The preview link is:

The incorrect plugin code is used. It seems a sample plugin code was copy-pasted in a WYSIWYG editor and then edited in design mode. As result sample code and your code were mixed by the editor. Switch the editor to plain text mode and fix plugin code.
