MOving to PHP7 - Getting Docs error
Posted by kdiamond - 2016/05/13 15:15
_____

I am trying to move tp PHP7 and I am having great luck with the exception of Ari Docs 2.0.   When I open an article that uses ARi Docs, I get this in the window:

0 Class 'Arisoft\Joomla\Document\Includesmanager' not found

I am an ARi DAtatables customer and it works fine - just having trouble with Ari Docs

Thank you

Hello,

Could you provide a link to a page where the problem occurs and a temporary access to your J! backend by email so we can investigate the problem? We can't reproduce it on our test server.

Regards,
ARI Soft

_____

Hello,

The problem is fixed in "ARI Docs Viewer" v. 2.0.1.

Regards,
ARI Soft
