With Office View can we remove unwanted clutter?

Posted by Romuba - 2017/05/05 06:14

_____

I want to display Excel spread sheet and the best viewer for what I need is the Office option but there is a lot of additional info that I don't need and don't want on the screen.

1. The Excel Online bar - remove
2. The Download, Save to Onedrive etc. controls - Remove
3. The column and Row headings - remove
4. Would like to be able to center the table on the page.

This is what I see http://my.jetscreenshot.com/28589/20170505-zd2m-54kb

Website is at http://www.christchurch.co.za/rosters.html

Using:

Joomla: 3.7.0
PHP: 7.0
Ari Doc Viewer: 2.1.1

_____

Hello,

It is not possible because "Office Viewer" services doesn't provide ability to modify viewer.

Regards,
ARI Soft
