PDF-file doesn\'t load in Edge

Posted by Lieve - 2017/06/26 10:44

_____

Hi,

I had a problem with loading pdf-files on some computers (PDF.js v1.5.222 (build: d20002b)Message: file origin does not match viewer's).
I installed the latest version of Ari Docs Viewer. This solved the problem I mentioned, but now the Docs Viewer doesn't load in Edge anymore. How can I solve this problem, please?

_____

Hello,

Check browser's error console (press F12 in IE or Edge browser), probably it contains any error.

Regards,
ARI Soft

_____

Hi

Unfortunately, again I have in all browsers the error which I had before: "An error occurred while loading the PDF: PDF.js v1.5.222 (build: d20002b)
Message: file origin does not match viewer's".
http://www.debron-har.be/bibdoc/antiqbron
You can see screenshots in different brwosers here: http://browsershots.org/http://www.debron-har.be/bibdoc/antiqbron
I have no idea how to solve this and I'd appreciate your help.

Best regards
Lieve

_____

Hello,

Currently the page doesn't contain a document which is loaded via PDF JS viewer.

Regards,
ARI Soft
