
ARI display html mode on the iPhone is cut

Posted by phieufbk - 2017/09/29 09:03

Hello,

I use ARI to show my document in two type: PDF and HTML.

On the iPhone, pdf is resizeable, but html is cut (see attach image).

Link example: <https://thuvienthaythonglac.net/thu-muc-tu-lieu/580-xem-ngay-gio-tot-xau>

<https://thuvienthaythonglac.net/thu-muc-tu-lieu/579-tue-phap-tac-y-me-tin-quang-loi>

...

I check on Android smartphone, It is displayed well, no cut.

Could you tell me why, and how to display html mode well on the iPhone ?

My website: thuvienthaythonglac.net

Best regards,

Phan Phieu

Hello,

Could you send a screenshot with the problem?

Regards,

ARI Soft

This problem with HTML document which is loaded by "ARI Docs Viewer". Images in the document are not responsive so horizontal scroll appears. Modify your document and the following code between `<div>` and `</div>` tags:

```
IMG {display:block;max-width:100%;height:auto;margin:0 auto;}
```

Regards,
