Download Option Not Disabled in Mobile View
Posted by dpitfield - 2018/01/10 01:23

_____

I have an issue with doc viewer download and trying to hide it.

We managed to disable the download button a while back for the viewer (in full screen). But I have noticed that when the screen is compressed to a mobile view size the users are able to still download the the pdf/article as the download option becomes available in the smaller view!
How can I get rid of this download option also?

See this video for an example of what is happening:

https://drive.google.com/file/d/1oHf_iqSAIJgFAQth-u-EctT61JGbLAKI/view?usp=sharing

view actual page at:
http://soccer.virnative.com/one-touch-passing/forward-passing-4vs2#pdf

Thanks,
Darren Pitfield

_____

Hello,

Open /media/arisoft/pdfjs/web/viewer.html file and remove the following code:

 Download

Regards,
ARI Soft
