Button \'Embed doc\' not working with JCK Editor

Posted by hammur - 2018/07/10 13:39

_____

Hi, if using the JCK Editor the editor button 'Embed doc' doesn't work. Nothing happens when clicking on it.

Normally editor buttons aren't depended on which editor you are using as they normally display below outside the editor (except when using TinyMCE).

If you download and install the JCK editor, are you then able to replicate this issue?

The 'Embed doc' button is working fine on any other editor I've tried, but JCK is the primary editor I use for Joomla sites so this is a bit unfortunate. http://www.ari-soft.com/images/fbfiles/images/Ari_docs_button_issue.jpg
