
Ari Docs Viewer + Postgres

Posted by jaume - 2018/11/27 13:23

Hi,

Is there any way to install the Ari Docs Viewer in Joomla 3.8 and Postgres. I get an error message

ERROR: LIMIT #,# syntax is not supported LINE 1: ... WHERE `type` = "library" AND `element` = "arisoft"....

In postgres "library" and "arisoft" will be taken as variables and not text strings, but I don't know where to find them in the installer, and if it could be more errors no so easy to solve.

Regards

Jaume

Hello,

The code is located in script.php file from pkg_aridocsviewer.zip archive. See "isARISoftLibInstalled" method.

PS: We will investigate this problem.

We updated the extension. v. 2.2.1 is compatible with PostgreSQL.
