
Selecting pdf documents

Posted by rbur - 2019/11/26 20:18

I have a requirement for ARI Docs to do the following:

Have multiple links to pdf documents on a single Joomla article. I need to be able select a pdf document link and then have it open ARI to render the selected document. In other wordsâ€¦ Have the ARI Docs link embedded in the link for each pdf document listed on the article page. Any suggestions?.

Thanks ...Ron

Hello,

The plugin doesn't support this ability.

Regards,
ARI Soft
