
what about joomla 4- error installing aridoc viewe

Posted by jeanluc.ferre - 2021/11/02 21:07

Hello,
What about the compatibilty of aridocviewer 2.1 with joomla 4.
I had error messages arisoft so i deactivated and then uninstalled aridoc..
Now whe i want to reinstall pkg-aridocviewer on a joomla 4 site i had the followin error : 0 Class 'JArchive' not found
when i debug the code i have this class in the following line of code : JROOT\tmp\install_6181a03226770\script.php:105
in this line the code is : if (!\$packager = JArchive::getAdapter('zip')) || !\$packager->extract(\$archivePath, \$destPath))..
Perhaps somebody can indicate me why this error happens? and if it is possible or will be possible to use aridocviewer
with joomla 4.
Thank you in advance for your answers.

Hello,

Currently the plugin is not compatible with Joomla! 4.x

Regards,
ARI Soft

Hello,
When can we expect to have a version compatible with joomla 4
Thank you for your answer.
