## How to set source file ?

Posted by sirajdhaka - 2014/06/07 21:38

---

Hello,

I could installed 'ARI Smart book' in Joomla 3.3. I could convert the PDF into JPEG also from import option. But I can not show the converted file in 'source file' location .  
How to set it ?

The attachment of the 'backen screen shoot ' . How can I set it ? My file path is:  
images/com\_arismartbook/pdf\_import/BRACUSAFY2013

looking your support

Best regards

I got one solution. The file path need to write at 'Description' file. I got the screen shoot at  
<http://extensions.joomla.org/extensions/directory-a-documentation/portfolio/27118>

Instead of 'Description', the form field name should be: 'File Path ' or 'Insert here your uploaded or imported file. It would be useful for all types user.

Hello,

Documentation for the extension is available here. For "Images" pages source is here. Don't clear what "Description" field you mean, path to folder(s) with images are entered in "Directories" parameter:

<http://www.ari-soft.com/images/fbfiles/images/images.jpg>

Regards,  
ARI Soft
