
First page loaded - other pages white

Posted by eskobar - 2014/10/08 05:38

When I load the book in a browser (tested in Firefox, Safari and Google chrome) first page is loaded. Other pages appear white. But as soon as I scroll down a bit, all pages appear normally.

You can check my function problem here:

Hello,

It seems this is a problem with lazyload script which is loaded by site template. Try to disable it in site template settings.

Regards,
ARI Soft
