Disable right click

Posted by radioregs - 2014/10/11 08:37

_____

Hi

I have a problem with the right click , save as image

I'm using Ykhoon content protector to protect my pages content , and when i enable zoom image appear centered on my browser and i cannot see left and right text , but if i try to center the image i cannot because ykhoon plugin disallow to use mouse features , so i was wondering if i can use something inside Ari Smart Book that overrides the ykhoon content protector and allow me to move the images but disable only the right click .

Thanks

Hello,

Could you provide a link to a page where we can see the problem? If it is private, you can send it by email.

Regards,
ARI Soft

This problem with extension which you use to protect your pages. It disables all drag functions, it is not a good. You can contact extension's developers and ask how to enable "drag" support for specific HTML elements.

BTW, all these protections can be circumvented for example via developers console (press F12).
