Hello,

Could you provide a link to a page with the book?

Regards,
ARI Soft

The book contains images and margin is used directly in images. It is not a content margin.

Regards,
ARI Soft

It is not clear, do you want to change margin in an image (in this case it requires to edit image) or content margin? If you want to change content margin, specify please number of page in the book where you want to do it.

Regards,
ARI Soft
