
NAVIGATION IN THE BOOK

Posted by TRIBU - 2015/06/05 17:38

Hi, can I create a link in the page of book same at gotopage? For example a link in the first page like the button smartbook-pagenavbar? Sorry for my english. Thank's

Hello,

It is possible to use the following link to navigate between pages if "Book settings -> Hash links -> Hash links enabled" parameter is set to "Yes" in book template settings and "Book settings -> Hash links -> Hash links prefix" parameter for example set to mybook value:

#mybookpage/PAGENUM

Where PAGENUM is a number of a page. For example #mybookpage/5, #mybookpage/10 and etc.

Regards,
ARI Soft

Sorry, I have another little problem. I charge the book in lightbox. Now the link at the page work correctly (image1), but when go to page in the lightbox, is loading the page of the site, not only the page of the book (image2). <http://www.ari-soft.com/images/fbfiles/files/ARIBOOK.zip>

This problem with value of tag. You can use the following code:

Go to page #2

instead of:

Go to page #2

to avoid redirection into a popup.

Regards,
ARI Soft

Sorry, I see the replay only today.
Unfortunately also this script don't work.
I try another version but also this don't work.
Is possible that must insert the function?
Please help me, is very important. The link is the same. Thank's

Your links look like:

instead of:

You can see it if open HTML source of the page. If you use a WYSIWYG editor try to switch it to plain text mode or temporary disable it and fix the code.
