how to publish a book like image

Posted by ndefreitas - 2015/10/01 03:32
_____

i will try to put a image in a module for my frontpage that open a magazine, but i dont know how to do that... like this page

http://www.demo2.ari-soft.com/ari-smart-book.html

but in a module. i dont want the small magazine in that module, just a preview image and them clic open a lightbox and show the magazine...

i buy the smartcontent too and the smartbook for that... is possible that you explain to me how can i use the lightbox for do that?

sorry by my english...

Nelson.

_____

Hello,

For example if you want to show a book with ID = 1 in "ARI Smart Content - Fancybox" lightbox, configure and enable "ARI Smart Content - Fancybox" plugin and enter the following plugin code into a content:

{fancybox url="index.php?option=com_arismartbook&view=book&bookId=1&tmpl=component" width="800" height="600"}{/fancybox}

Where LINK_TO_THUMBNAIL is a link to a thumbnail image.

Regards,
ARI Soft
