## Where to set the dimension of the book?

Posted by mdivk - 2016/02/15 20:05

---

Hello,

I am excited to create my first ever book using this product on my local wamp site, I successfully import the pdf file into jpeg images and am able to open the book, however, there are two questions here:

1. Why the book size is not set to the normal size? A4 or Letter. Please see my attached screenshot for your info.
2. How do I add a "jump to" textbox and button like the demo site?

Thank you very much. [http://www.ari-soft.com/images/fbfiles/images/Screenshot\\_\\_2016\\_2\\_15\\_\\_15\\_01\\_25.png](http://www.ari-soft.com/images/fbfiles/images/Screenshot__2016_2_15__15_01_25.png)

Hello,

Open "ARI Smart Book -> Templates" page and select template which is used for the book:

1. See "Styles settings -> Optimum page width" and "Styles settings -> Optimum page height" parameters. Populate them with width and height of images which are used in the book.
2. Set "Slider settings -> Show page search" parameter to "Yes".

Could you provide a link to a page where the problem occurs? It seems this is a conflict with a 3rd party extension or site template styles.

I made some css change so the search box is away from the book bottom edge, I want to do some change to the search box itself like height and width.

And it would be greatly appreciated if the css works in various browsers, for example, the search box actually shows a correct height in firefox, but still not in Chrome.

---

By the way, the front-end showing effect of the book (font) is good in FF and Chrome, it looks horrible in IE, is it something fixable?

Thanks. <http://www.ari-soft.com/images/fbfiles/images/IE.png>

As this forum seems do not support multiple images, here is the other screenshot in Chrome <http://www.ari-soft.com/images/fbfiles/images/Chrome.png>

Sorry, but we can't investigate style conflicts by screenshots. Send a link to a page where we can see the problem so we can investigate it.

Screenshot in FF which font is great, I want to be able to adjust the size of the search box,

Thanks <http://www.ari-soft.com/images/fbfiles/images/FF.png>

Add the following CSS rules to a site template CSS file:

```
.smartbook-overlay,  
.smartbook-overlay *,  
.smartbook-overlay *::before,  
.smartbook-overlay *::after {
```

---

```
    box-sizing: content-box;
}

.smartbook-bottom-toolbar .smartbook-pagenavbar {
    top: -20px;
}
```

```
BODY INPUT.smartbook-page-selection {
    font-size: 13px !important;
    line-height: 22px !important;
    height: 22px !important;
    margin-bottom: 9px !important;
    width: 40px !important;
    padding: 4px 6px !important;
}
```
