How to use cloud convert?

Posted by Miktowers - 2016/04/17 20:49

_____

Hi:

I'm installing Ari Smart Book in a shared hosting without Ghostscript. I've see the option for cloud convert pdf, but can't find any reference about how it works.

Your help will truly appreciated.

Thanks

_____

Hello,

Register on CloudConvert site, login and find an API key on "Dashboard" page. Copy the key and insert it into "Import settings -> CloudConvert settings -> API key" parameter on "ARI Smart Book -> Config" page on component backend. That's all.

Regards,
ARI Soft
