
Select PDF file as option of uploading

Posted by Miktowers - 2016/05/30 00:39

Hi good people!

Due limitations of my shared hosting, I can't upload files larger than 32mb. But I need to give the chance to download larger files. So, it could be a good option to have also the chance to select a file already uploaded.

Thank you!

Hello,

If you mean "PDF Version" parameter from "Download" tab on book settings page, you can upload files manually via FTP for example to /images/com_arismartbook/download/BOOKID/ folder and they will be appeared on "PDF Version" drop-down. Just replace BOOKID with ID of the book. For example for book with ID = 3, it will be /images/com_arismartbook/download/3 folder.

Regards,
ARI Soft
