Out of memory error

_____

Hi,

I moved my site with Ari Smart Book to another server and when i trying to enter a category or a book, i get en error:

"5 Out of memory (Needed 1048548 bytes) SQL=SELECT a.id AS value, a.title AS text, COUNT(DISTINCT b.id) AS level, a.parent_id FROM #__usergroups AS a LEFT JOIN `#__usergroups` AS b ON a.lft > b.lft AND a.rgt < b.rgt GROUP BY a.id, a.title, a.lft, a.rgt, a.parent_id ORDER BY a.lft ASC"

Do you know what that means?

Regards,
Tomek

Re:Out of memory error

_____

Hello,

This error can occur when a small value of "memory_limit" PHP parameter is used. You can try to increase it with help of "PHP Settings" Joomla! plugin or set it directly in php.ini file.

Regards,
ARI Soft
