## Bug while zooming on first page in mobile

Hi,

I've encountered a bug.

When I view my website from mobile and click on the first page of the book (or on the zoom button) which is presented as a single page the page is lost and I need to move around to find it.

Here is the link to the website with the Smart book in it:

Please advice,

Guy.

Hello,

Try to update the extension to the latest version (1.10.5).

Hello,

I've updated the extension and the problem was not fixed.

When I have one page, the first one, I click on the book and it disappear.

Guy.
