
CloudConvert issue on PHP7

Posted by mcintyro - 2017/02/01 09:54

Trying to use the CloudConvert option - getting this error since my hosting package was moved to a PHP7 platform:

Fatal error: Redefinition of parameter \$_ in
phar:///home//public_html/administrator/components/com_arismartbook/kernel/Integration/CloudConvert/cloudconvert-
php.phar/vendor/guzzlehttp/ringphp/src/Client/StreamHandler.php on line 313

Can you help?

Hello,

Update the extension to v. 1.10.7.

Regards,
ARI Soft
