
auto page display mode not fully working?

Posted by wcowonlin - 2017/02/10 20:52

We have the "pages display mode" inside our book template set to "auto" and we have the "double page min width" set to 700.

Our flip book can change from 2 page to 1 page, but then cannot change back to 2 pages afterwards. Do you know if this is a bug? We see the same behavior if we try it on a desktop browser and a mobile browser (tried latest version of firefox and chrome).

I can send you a link to an example page we have set up if necessary. Do you have a way to privately send you such a link?

Hello,

Could you provide a link to a page where the problem occurs?

Regards,
ARI Soft

Yes, is there a way to privately send you a link? Could I perhaps email it to you?

Update the component to v. 1.10.8. It should help.
