Hello,

Could you explain what problem do you have? The books are responsive by default.

Regards,
ARI Soft

When a book is based on images, they will be responsive and show in small size saving aspect ratio. For books based on text, it is not possible to do it because text will be not readable. A possible solution is showing one page instead of two on small screen (for this open "ARI Smart Book -> Templates", choose template which is used for the book, open "Book Settings" tab, set "Pages display mode" to "Auto" and specify an appropriate size in "Double page min width" parameter, for example set it to 400).

Regards,
ARI Soft

Hello,

You can see how image based book looks on our demo site.
