
Plugins disabled ? [Solved]

Posted by jmgroud - 2018/11/19 15:59

Hello

I have created a book with this description :

Audio

{mp3}directory/audiofile{/mp3}

VidÃ©o

{mp4}directory/videofile|300|200{/mp4}

The plugins seems disabled in the description's book, but it's OK in a simple article...
Why ?

Thank you for your help !

Hello,

We can't reproduce this problem. Checked it with AllVideos plugin. If you use any Joomla! cache plugin, try to clean cache. If the problem still appears, could you provide a link to a page where the problem occurs and a temporary access to J! backend by email so we can investigate the problem?

Hello

I don't use particular system cache on my website.
Cache system is disabled.

e-mail sent :-)
Thanks a lot

We updated component to v. 1.10.15. It contains "Prepare content" parameter on "ARI Smart Book -> Config" page. Set the parameter to "Yes" and the component will process Joomla! content plugins in descriptions.

Hello

Thanks... It's better but there is a bug :unsure:

See here : <http://didine.jmgi.fr/index.php/fr/book-les-mots-bleus?view=category&catId=3>

I indicated 1 audio file and 1 video file in the description of book 2
Then 1 audio file and 1 video file in the description of the book 3
And...

All audio and video files are displayed on the same book (number 2)
:woohoo:

What is going on ?

It looks like an issue with AllVideos plugin. It generates the same ID for container elements for the same file. As result media files are added to the element which occurs earlier on the page.

Yes it's true :blink:
OK all is good now (but only for the description of books)
Thanks a lot :)

This is not fully corrected ...

I have the same problem in the description of the category ...

:unsure:

Can you check and see if there are any other places where there would be descriptions?
Thanks
Jean-Marie
