
Set Height.. not width

Posted by juliajerome - 2019/06/08 19:41

How do i make the height of my books leading? Not the width?

I would like the books to always fill screenheight. Any ideas? There is a setting for height at the template level, however taht only handles px. And i want the height to always be 100% for example and the width then to be relative to that.

Hello,

Sorry, but the extension doesn't support this ability. It can create width based books.

Regards,
ARI Soft
