
Scan resolution

Posted by Adamowicz - 2019/12/19 13:00

Hello

What is the optimal resolution of the scans used to generate a flippingbook in ari-book ?

Regards
Mariusz

Hello,

The images will have better quality with more highest DPI (Dots per inch), but it will also require more time to generate them. You can play with this parameter and find more appropriate for your needs.

Regards,
ARI Soft
