
Does not work with mouse

Posted by egdotcom - 2015/08/25 12:54

Hi - have set up for Mouse wheel support but does not work on mouse clicks.
Any ideas?

Hello,

Could you provide a link to a page where the problem occurs?

Regards,
ARI Soft

Set "Bring to front" parameter to "Yes".

My thanks again - works great.

Did I miss a manual?

One final question - to get the individual images to correct size the styles parameter is set to 1000 x 650 but leaves a lot of white space above the carousel. If I make it smaller, the images are smaller and white space still there.

Is that normal? Is there a perfect ration of height to width I should use?

Thanks again

You can play with "X radius" and "Y radius" parameter. Can read about it here.
