# title not shown in popup

Posted by flos - 2018/08/06 11:14
_____

Hi there
I have a site with installed module ARI Cloud Carousel Pro and Fancybox plugin.
In both the parameter 'Show Title' is set to yes, and the image-directory has a description file in it.

The titles are shown in the module as they should, but in the fancybox not. In the HTML of the fancybox I have just a empty title-elemnt with 'display:none' style:

What did I miss?

Galery is here:
server3.masterhomepage.ch/~cerletti/index.php/kunstmalerin/landschaften-und-stilleben

Thanks in advance, regards
florian

Hello,

The lightbox doesn't show titles which are defined in  section in INI file. It shows data from  section if it is defined so you can add  section to .INI file.

If you want to use data from  section,
/modules/mod_aricloudcarousel/mod_aricloudcarousel/kernel/CloudCarousel/class.CloudCarousel.php file can be modified. Replace the following code:

```
        if ($description)
            $lnkAttrs = $description;
```

with the next one:

```
        if ($description || $title)
            $lnkAttrs = $description || $title;
```

Regards,
ARI Soft
