
Show Chart with Image

Posted by keita - 2015/05/22 23:18

How does one add an image to a node? I have been trying to add a png image to a node without success! All other html code are rendered correctly except for the image bit.

Thanks for your suggestions.

Keita.

Hello,

Could you provide the plugin code which you use and a link to a page where the problem occurs?

Regards,
ARI Soft

can you show a code how to insert photo and name in the node.
I tried to insert image and the name. The size of the image becomes long, I want to reduce the size.

http://www.fsecoman.net/index.php?option=com_content&view=article&id=206&Itemid=229&lang=en.

Also why some some rectangle box comes down the first images?

Rectangle is shown according to HTML code which is used for node content. It could be added by a WYSIWYG editor. Switch your editor to plain text mode and remove unnecessary code.

About images, they look normal:

I'm struggling to do the same thing that you did, in my case the image won't show
could you paste down the code you used please ?
Thanks in advance !
