
facebook harvesting

Posted by tincanned - 2015/07/29 07:12

Hi i am looking to add a number of facebook groups together for a website page information service for a area. The groups have been around for some time and have different administrators so i can't get the api for each one. will this work without the api for each group?

Many thanks for your help in advance.

Hello,

The extension uses Facebook API to load posts of selected Facebook users.

Regards,
ARI Soft
